Technical Experience

WEB DESIGNER / DEVELOPER | HEAT DANCE, Los Angeles, California   Mar. 2020 - Sept. 2020
- Collaborated with 20+ developers via open source to bring new designs, SEO, and marketing strategies to their website which increased traffic by 30%.
- Managed the website and online video portal through the use of HTML and CSS.
- Played a crucial role in the development and maintenance of their online presence by solving an average of 25% of bugs and issues per week.
- Created and worked on 5+ pages, templates, and new designs using visual composer and Wordpress.

WEB DEVELOPER / DESIGNER | JW, Culver City, California   Jan. 2018 - Present
- Design & Develop 10+ websites through the use of programming languages, Photoshop, and Wordpress.
- Pitch to potential clients the design and development of their websites. Consistently update website styles and layouts through the use of Divi, HTML, CSS, and Javascript.
- Build landing pages, transfer data, and create forms e.g., contact and gravity forms.

DIGITAL MEDIA COORDINATOR / WEB DEVELOPER | OC SITES, Aliso Viejo, California   Sept. 2017 – Dec. 2017
- Created, managed, and maintained 30+ websites while communicating with off-shore talent.
- Led a team of 5 - 10 developers via Slack to meet the cost and time-requirements of an early stage start-up.
- Website Design & Development - WordPress, Divi, Wix.
- E-Commerce Shops - Shopify.
- Lead on average 2 meetings per week with high end clients to plan strategically and creatively on how to build their website.

Projects

GIGGLEBYTES | TEAM, 5 days | https://github.com/skaiser33/sei_project2
- *Full-stack application that allows logged-in users to view a list of jokes by a particular comedian or topic. This app features full user authentication and allows for the user to create an account for a unique email, login securely, update passwords, and delete an account.*

MOOVIE WIZ | SOLO, 4 days | https://github.com/JacobRishe/API_APP
- Created an app that fetches data from an external API through the use of interpolation.

POTO | SOLO, 7 days | https://github.com/JacobRishe/Poto-Frontend
- Full-stack application using the MERN stack. PoTo allows logged-in users to view a list of polls created by other users, and then give their opinion by clicking the yes or no button. The logged-in user can also create their own poll to allow others to cast their opinion on their question as well.

WAYFARER | TEAM, 5 days | https://wayfarer-sei.herokuapp.com
- Full-stack application that allows users to log-in and post reviews about their travel adventurers. As the user signs up for an account, it will greet the user by name along with the current city he/she is in.

Education

GENERAL ASSEMBLY | Software Engineering Immersive   Jan. 2021 - Apr. 2021
